Letter of Recommendation

To whom it may concern,

EuroCape is an international onshore renewable wind energy group focusing on key European growth markets with strong wind-resources, favorable grid infrastructure and supportive regulatory regimes.

We hereby would like to recommend the company CTE Wind Civil Engineering, with which we have enjoyed a successful and highly satisfactory working relationship, in terms of both efficiency and professional ethics.

CTE Wind Civil Engineering designed the foundations for the following projects:

- Chery Wind Farm (Cher, France) with 7 Vestas V100 – 1.8MW 95m
- Saint Pierre de Maillé 3 Wind Farm (Vienne, France) with 8 Siemens SWT-3.0-113

The designs complied with the applicable regulations and standards and was submitted in due time.

We therefore consider CTE Wind Civil Engineering to be a valuable and reliable partner.

Best regards,

Olivier Marchand
Construction & Operations Manager
