

## **Recommendation Letter on behalf of CTE Wind Civil Engineering**

We have been working with CTE Wind Civil Engineering for many years with a proven track record of success.

They have designed some of our onshore wind turbine foundations for numerous projects in France, such as:

- Pléchatel, 4 windturbines
- Fortel en Artois, 11 windturbines
- Fiefs, 6 windturbines
- Roye, 16 windturbines
- Grand Fougeray, 2 windturbines
- Valhuon, 10 windturbines

We are currently working together on some other wind projects in France and abroad.

Therefore, we can confirm that their studies follow the standards in force and submission deadlines are always respected.

Finally, their knowledge regarding onshore wind turbine foundation design and know-how with wind turbines from all kind of manufacturers makes it possible to easily obtain the approval of Control Authorities assigned by Project Managers and others.

Best regards

Grégoire Verhaeghe  
CEO of InnoVent
