## Recommendation Letter

*To whom it may concern,*

Senvion is one of the leading international manufacturers of onshore and offshore wind turbines. All across the globe, we are developing, constructing and distributing wind turbines for almost every location. The power ratings of our turbines range from 2 up to 6.2 MW with rotor diameters between 82 and 152 meters. Furthermore Senvion provides clients with project-specific solutions in the areas of wind farm engineering, service and maintenance, transport and installation as well as foundation.

We hereby state that, up to the current date, the company CTE WIND Civil Engineering, with which we have enjoyed a successful and highly satisfactory work relationship, in terms of both efficiency and professional ethos, is a recognized supplier for Senvion with which we intend to continue a business relationship.

We recognize that the know-how cumulated by CTE WIND Civil Engineering, regarding onshore wind turbine foundation design, allowed us to have their drawings easily approved by the Control Authorities assigned by the Project Managers.

We therefore consider CTE WIND Civil Engineering to be a valuable and reliable partner.

Best regards,

---
